
WP fail2ban Add-on for Gravity Forms

Charles Lecklider

Mar 09, 2021

CONTENTS

1 Configuration 3
1.1 Typical Settings 3

This add-on extends [WP fail2ban](#) with support for spam form submission via Gravity Forms.

CONFIGURATION

1.1 Typical Settings

1. Copy *wordpress-gravityforms-extra.conf* to your *fail2ban/filters.d* directory
2. Edit *jail.local* to include something like:

```
[wordpress-gravityforms-extra]
enabled = true
filter = wordpress-gravityforms-extra
logpath = /var/log/auth.log
maxretry = 1
port = http,https
```

3. Reload or restart *fail2ban*
